

EVENT FINDER WITH NAVIGATION SYSTEM  
AND DISPLAY METHOD THEREOF

Abstract of the Disclosure

5 An event finder on a remote terminal for finding events  
such as movies, sports, weather, news and the like through a  
remote terminal such as a lap top computer, personal digital  
assistant (PDA) and vehicle navigation system with  
positioning capability. The event finder includes a display,  
10 a data terminal connected to the display for processing data,  
a navigation system for determining position of a user and a  
destination, and a transceiver for receiving event data from  
an event data server through a communication system. The  
data terminal associates the event data from the event data  
15 server with position information from the navigation system  
and retrieves event information based on a selection method  
specified by the user.
